**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-2, 5-9 and 12-14, drawn to a method for controlling functionality of an application program by interpreting information contained in a token, classified in class 726, subclass 30.
  - II. Claims 15-18, drawn to a method for content providers to control features that are presented in a browser based on a presence of absence of a token, classified in class 726, subclass 30.
2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are directed to related processes. The related inventions are distinct if: (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have different modes of operation, functions and/or effect. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.
3. Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after

the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. During a telephone conversation with Lawrence A. Aaronson on 04/29/2010 a provisional election was made to elect without traverse to prosecute the invention of Group II, claims 15-18. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-2, 5-9 and 12-14 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

***Examiner's Amendment***

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lawrence A. Aaronson on 05/04/2010.

The application has been amended as follows:

15. (Currently Amended) A method for content providers to control features that are presented in a browser, said method comprising:

providing a token to a web site;

associating said token with said web site;

receiving at a web server a request for information for said web site from a browser; and

invoking a level of functionality of said web site at said browser based on a presence or absence of said token,

wherein invoking a level of functionality of said web site at said browser further comprises:

invoking a full level of functionality of said web site at said browser when said web site has said token; and

invoking a reduced level of functionality of said web site at said browser when said web site does not have said token.

16. (Canceled)

6. The following is an examiner's statement of reasons for allowance: the prior art fails to teach invoking a full level of functionality of said web site at said browser when

said web site has said token; and invoking a reduced level of functionality of said web site at said browser when said web site does not have said token.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
